

Incoming Photon

13.329 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

12.756 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

3.124 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

3.024 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

13.228 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

12.094 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

3.124 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

2.858 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

13.062 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

10.204 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

3.024 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.

Incoming Photon

2.858 eV

If your electron is in the correct lower energy level, move it to the new level corresponding to this energy change.
